

DHB Series

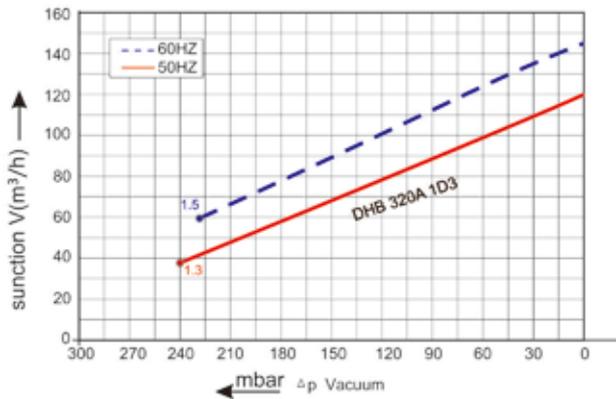

DHB 320A 1D3

Technical datasheet

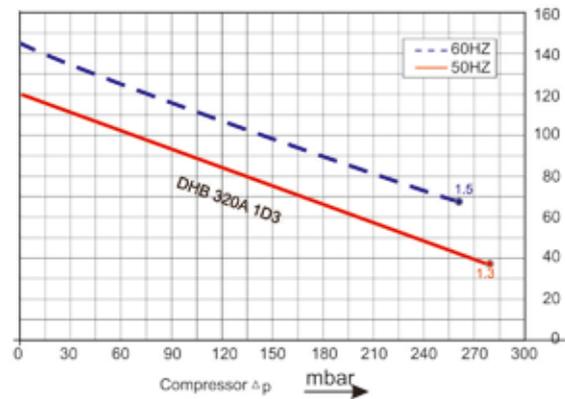

Dereike blower performance curves

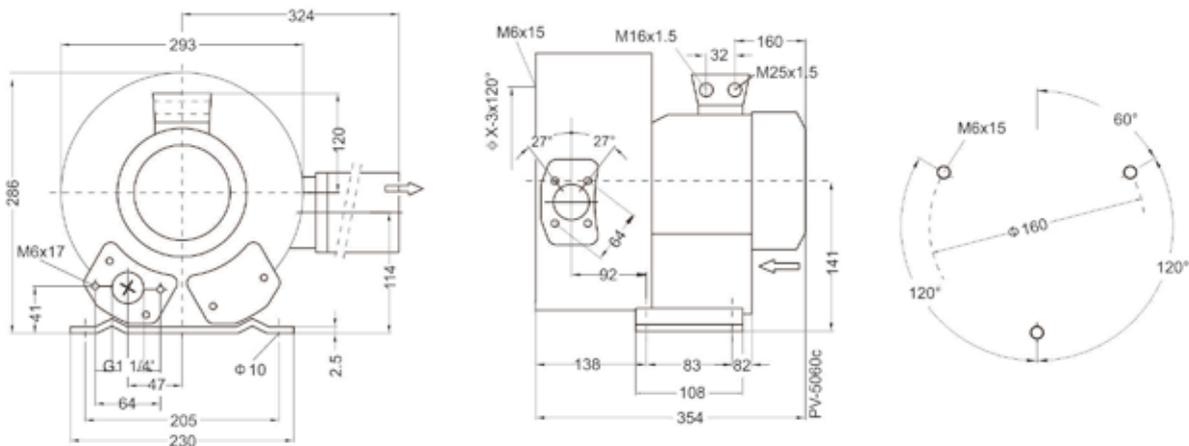

Vacuum selection diagram curve

Compressor selection diagram curve

Dereike blower installation drawing

Dereike blower parameter

Model	Frequency	Output	Voltage	Current	Airflow	Pressure		Noise	Weight
	HZ					vacuum mbar	compressor mbar		
DHB 320A 1D3	50	1.3	200-240△	7.3△	120	-240	280	58	17
	60	1.5	220-275△	8.3 △	145	-230	260	60	17

The performance curves of Dereike blower is tested through below ways:

Under one atmospheric pressure, suck 15°C air and then you can calculate the data, of course allow 10% difference, and when the sucked air and surroundings temperature are not higher than 25°C, you still can get total pressure difference as the curves shows.
